ULTRASONIC CLEANING

The Super Mighty One (SM-200)

This all-in-one unit is the largest, most powerful Firesonic cleaning machine in the Morantz Ultrasonic family. Its vast size, pneumatic lift and dual work shelves make this a truly diverse system for all types of cleaning: fire restoration, water restoration, mold remediation, window blind cleaning, parts cleaning and practically any other item that can fit into this large tank.

The Princess (B-126)

The extra-long tank can handle it all. Clean large, oversized blinds, light diffusers, filters, IV poles, area carpets and more. Designed as a stationary machine, The Princess comes with your choice of built-in transducers or transferable immersible packs.

BEFORE

AFTER

Sun-Brite uses both of these cleaning systems in our day-to-day operations. We strive to provide each customer with the finest cleaning resources in today's technology.

CONTEST

Cats make over 100 different vocal sounds; dogs can make about how many?

Please email your answer to johnk@sunbrite.net

Did you Know

~ One gallon of used motor oil can ruin approximately one million gallons of fresh water.

~ The Grateful Dead were once called 'The Warlocks'.

~ 68 percent of a Hostess Twinkie is air!

IICRC S500, 3rd edition

Section 12.1.20

States the following:

Airmoving devices used to create a general drying environment, when practical, should be set up so that continuous rapid airflow is provided across wet surfaces. In many structural drying situations, one of the most difficult areas to dry is the lower part of the wall where it meets the floor. Restorers should install one air mover for each 10 to 16 linear feet of wall, with the outlet of each air mover pointing in the same direction. With the air mover almost touching the wall, restorers should aim it's outlet at the wall at a 15-45 degree angle, depending upon the airmoving device used (centrifugal, axial). In addition, restorers should consider installing at least one air mover for each small bathroom, closet, or other offset or inset.

Centrifugal Airmover

Axial Airmover
